

Community Council Minutes- February 13, 2018

Next Meeting: March 13, 2018 @ 4:00 pm

Community Council business

Reviewed Training from November. We had wonderful attendance from our Committee. We had the most members there out of any other school.

School Plan Review

Mrs. Midgely reviewed the school plan for next year. Members shared opinions on goals and how money will be spent. Our main goal at Windridge is to create a culture of learning. We will do this by increasing student literacy, implementing STEM practices in every classroom, increase proficiency in Language Arts, Math and Science, and increase the number of 5th and 6th graders in keyboarding. Funds are allocated to each goal and will benefit each classroom. Mrs. Midgely and a small team will attend the Learning First Day sponsored by the District to finalize the school plan.

Trustland Budget Review

Budget was revised to coordinate with new goals. Council felt money is being well spent and is in line with our goals for next year.

Community Topics

Follow up on STEM Garden. Lisa Hyde is head of the Garden Committee. They have met and are in the process of meeting with the District Landscape Supervisor who will oversee their plan and the process. They are waiting on the district survey and then will move on to the next step. It's coming along great.

Boundary update..All students attending Windridge will feed to KJH and then on to DHS.

Jessika Christensen is supervising our Super Science Night, March 12. Many new sponsors and workshops. Many more hands on activities where children will build STEM projects that they can take home. It will be great.

Next Meeting Scheduled: November 10, 2017 @ 4:00 pm
