

# Windridge STEM Lab

We invite you to help create a space where every student at Windridge Elementary can develop a love of Science, Technology, Engineering and Math. This STEM lab will be filled with the technology, tools, and supplies necessary for students to explore, discover, and apply the skills they need to be successful in elementary school and beyond.

## This exciting addition to our school will include:

- Hands-on exploration and application of STEM through cutting edge technology, apps, and software
- Advanced scientific tools, including 3D printers and an Infini-D lab
- Facilities and space to encourage students to question, explore and discover through experiments and observation
- Makerspace area for allowing students to be creative
- Lego wall and magnetic PVC wall for engineering and building

# Invest In Your Child's Future

We estimate this project will cost approximately \$50,000. Currently, we have raised almost \$25,000.

Right now your donations will be matched dollar for dollar up to \$5,000.

## Help Us Reach Our Goal

To donate, please contact:

**Principal Casey Pickett**  
801-402-3550

**Head Secretary Sandy Kariya**  
801-402-3550

## Your Donation Will Fund:

\$25 buys 3D printer filament

\$50 buys a set of Legos

\$75 buys an Ozobot

\$100 buys a microscope

\$250 buys a Chromebook

\$300 buys an iPad

\$500 buys makerspace tables

\$1,000 buys a 3D printer
